

Hawaiian Gazette

PUBLISHED BY
THE HAWAIIAN GAZETTE CO., (Limited)
Every Wednesday Morning,
AT FIVE DOLLARS PER ANNUM
PAID IN ADVANCE.
Postage Subscriptions to Agents,
which includes postage.

Editor, R. T. ATKINSON, ROBERT CRIEVE,

200, Queen Street, Honolulu, N. H., U. S. A.

The Proper Course.

For a Circular Price List.

I have just seen the Circular, but you

will not be able to get it until

the next issue. Can you give me

any hint as to the price of the

new book? I have not yet

seen it, but I am told that it is

not very good.

Secondly, I would like to know

what is the price of the new

book which is to be published in

the fall of this year?

Thirdly, I would like to know

what is the price of the new

book which is to be published in

the fall of this year?

Miscellaneous.

Can the girl who elopes be termed the maid of mist?

They are five hundred and forty-six

tiny missionaries in India.

There are 186,000 Masonic lodges in the world, with a membership of 1,860,000.

The new German minister to Washington is reposing in the name of Alvinsele.

A Paris chirurgeon says that 75 per

cent of the French people have deformed feet.

At a free ice-water tank in New York over twelve hundred pounds of ice is used daily.

Mark Twain likes to have a good time in a while. He has been cost him \$120.

Edison says that if a telephone wire could be carried above the trees and mountains, one could wander around the world.

Mrs. Mary Phelps Dodge, of San Francisco, receives a salary of \$5,000 a year. Mrs. Mary L. Booth, the editor of Harper's Bazaar, receive a like amount.

The prospectus of an electric sweat band for men has shown that it stimulates the imagination, strengthens the memory, and greatly augments the working power of the brain.

Prophets are impaled into Jamaica to stop the ravaging of the country and their task, the burning question now is how to get rid of the impalings which the blacks have a superstitious fear of killing.

The total number of horses, mules, cattle and sheep in the United States at the last census was 130,877,881. The total number of hogs was 47,681,700 or 36 per cent. of the combined number of all other animals than those above named.

Ostrich farming in South Africa has advanced with such strides that the number of tame birds there is estimated to have increased from eighty in 1865 to at least 1,000 in 1884, producing feathers for export to the value of about \$800,000 per annum.

"Ever had a cyclone here?" asks a native. "Yes, we have had a cyclone every year in the East." "A cyclone?" Oh, you said an ant. Daniel Brown, an Englishman from Boston, a spic ago, but law in couldn't ride it. Tumbled off every time he tried.

The preferred style for white lawn dresses is a round skirt with ruffles and no waist; a tucked blouse or full Mother Hubbard waist behind, and a big bow and ends in the back for sash drapes. This style is pretty and popular for all kinds of plain colored wide-gored dresses.

A process has recently been discovered by which natural dyes of all descriptions can be preserved for years. A process that was given up for years for want of society and made them retain their fresh and beautiful appearance for years would be a much more valuable discovery.

Creamed milk, according to the Medical Record, is made by subjecting milk to a heat of 100 degrees until the watery part has been evaporated. Then it is creamed, and sugar is added, when it looks like cream. It is less solid than condensed milk, and with water closely resembles natural milk.

"My god, poorly, and man's gone away, we're better, she has, and one little boy, and we're going to another the other day."

"What's your god away for?" said the other diminutive girl. "Because the doctor said I had to be quiet, and she'd be thought she wouldn't be quiet with me around the house so had to go."

A writer in a scientific magazine says the Pacific habitation oysters may be expected late in March. The Hiroshima oysters hatched on April 25th, and the Pincta erythrophthalma about May 1st. This, by the way, is the time we expect them to put in their appearance—and we shall be disappointed if they do not.

When a crack is discovered in a stone chimney, such as may or may not transpire, the aperture may be completely closed in a moment with a composition consisting of wood ash and common salt made up in a paste with a little water, and plastered over the crack. The good effect is equally certain, whether the stone is hard or soft.

A sheet of ordinary paper burned in front of a fire will, in a dark place, give a very decided streak upon the application of the hand, and will appear as a glowing red. Place a sheet of gold leaf between two sheets of paper, then alcohol, and pass a pencil point over them in a zig-zag course, and a luminous streak quite strong will appear.

CHINESE out for life.

Mr. Lyell of London were all over three score and ten. Sir Robert Morrison, nearly died at a very advanced age. Michael, who had been put into the hands of the best surgeon in the world, died at the age of 75. Dr. Gouraud, at the age of 75, published a history of France. Another history historian, Mr. G. B. V. Verneuil, aged over 74.

Hercules relates that when any man did not among certain tribes his next neighbor killed him directly, lest he should lose his flesh, and thus his body become unfit for food. So when any one of these people found himself imposed as witness privately into some difficulty, he would make a hole in the ground, and cover it over, and when you're about it you may give me a pistol. As I was saying, the conduct of these men was entirely unjustifiable and they ought to be made to suffer for it."

Lord Lindsay states that in the course

of his wanderings and the pyramids of Egypt, he stumbled on a mummy which proved to be his kinsman's to be least 1,000 years old. In examining it after it was unburied, he found in one of the nostrils a small piece of dried resin, which he identified with the opinion of how long vegetable life could last, and took the root from the mummy's hand and planted it in a sunny spot, allowing the resin and resin to grow. The plant descended upon it, and in the course of a few weeks the root took hold and blossomed into a most beautiful plant. The story is said to be true.

Mr. Smith: "Only think what horrid crimes those Arctic savages were to resort to in order to live."

I'll take another piece of that steel, please, and another potato. Mr. Smith: "Horrid! you may well say that my dear. Entirely unjustifiable, and I hope that God will help me to avenge you of coffee, a bitter poison of men." That you are, and when you're about it you may give me a pistol. As I was saying, the conduct of these men was entirely unjustifiable and they ought to be made to suffer for it."
